Funhouse Science Fair Another Hit!

The eight annual Funhouse Science Fair was a great success. More than 55 projects were entered with over 100 kids participating, including terrific entries from most neighboring islands.

Once again three scholarships were given out to the top High School projects. Third place went to Lanie Padbury for *The Surface Tension of Water*, second to Sam Prado and Lindsay Anderson for *Bubbles*, and the first place scholarship to Grace Thompson for her project on bacteria on local restaurant silverware.

Every year the Funhouse judges (Wizards) pick one “Best of Show” project which is awarded the the “Richie Moore Rocketship of Wonder”. This year the prize went to Lily Woodard of Shaw Island for her project on the Sense of Sight.

The Science Fair was generously sponsored this year by Bob and Phyllis Henigson, Tad and Jeanne Sommerville, and Carl de Boor and Helen Bee. Camp Orkila and Darvill’s Bookstore also pitched in with food and prizes.

We look forward to having you all back next year!
